

WHITNEY POND

(Winchendon)

General Information:

Whitney is an average sized (110-acre) warm water pond located in Winchendon north of Route 12. The water is a brown color with a transparency of 3.5 feet. The shoreline is undeveloped. Aquatic weeds are dense around the entire perimeter of the pond.

Boat access is available for car top boats on a gravel ramp off of Central Street. Shore access is available along most of the pond's perimeter.

Fishing:

Whitney is annually stocked with 500 trout during the spring season. Largemouth bass and chain pickerel provide fishing for warm water game fish with some good-sized individuals of both species. Bullheads, yellow perch and black crappies provide most of the pan fishing.
